

WALLTOPIA

DO-IT-YOURSELF BOULDERS

THE SMART BOULDER SOLUTION

We reached out to a number of climbers who prefer to build their own walls and asked them why.

Most common responses?

"I AM THE DESIGNER"

"I ENJOY CRAFTWORK AND CARPENTRY"

"THERE'S NOTHING ON THE MARKET THAT FITS MY BUDGET"

Bearing in mind these answers, we came up with a solution that covers them all - **Walltopia Do-It-Yourself Boulder**.

Produced by high quality Ply panels, the DIY Boulder gives climbers the opportunity to create their own boulder design and assemble it themselves.

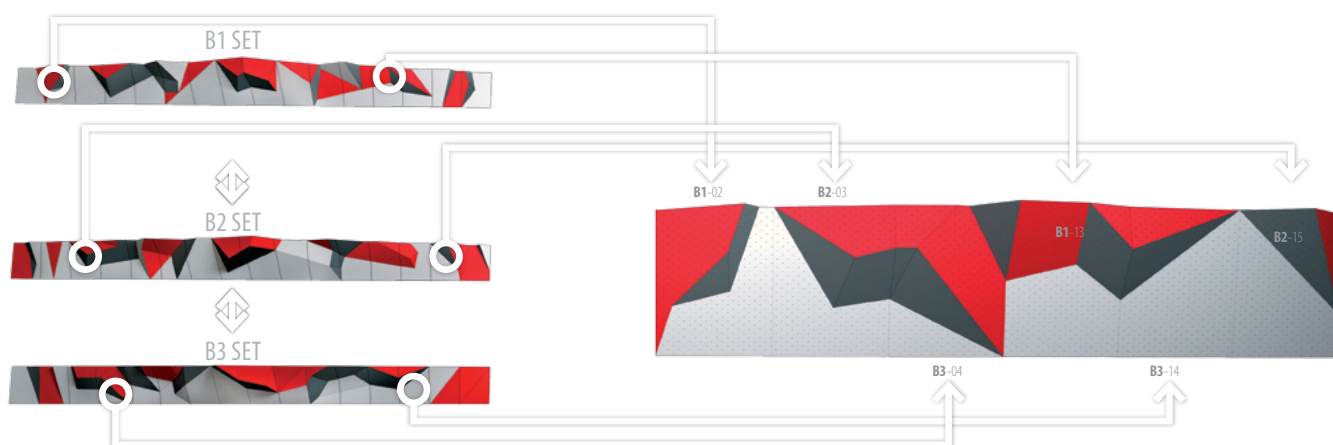

It works really simple. You combine a number of boulder modules and discover your preferred style using different design options. When

you make your choice, the panels come premanufactured with all components required for fast and easy installation just following the instruction manual.

Designed, engineered and produced by people with extensive knowledge and expertise in the field, the DIY Boulder complies with all industry safety and quality standards.

And yes, all of this comes at a fair price.

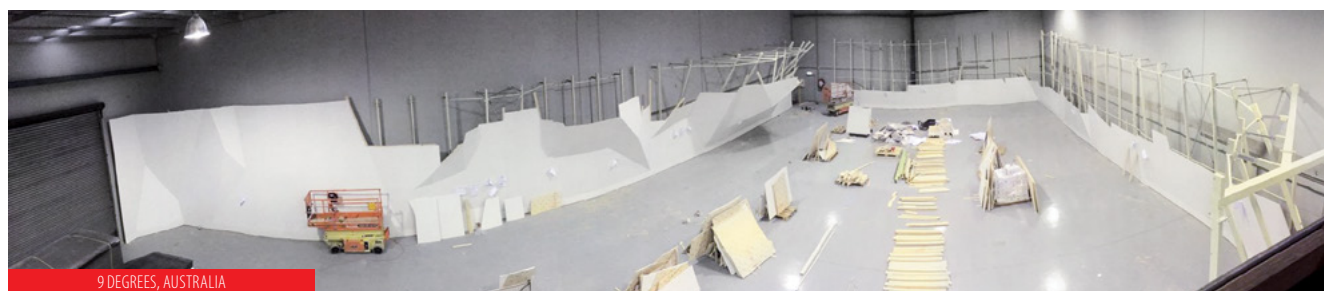

INTERCHANGEABLE MODULES

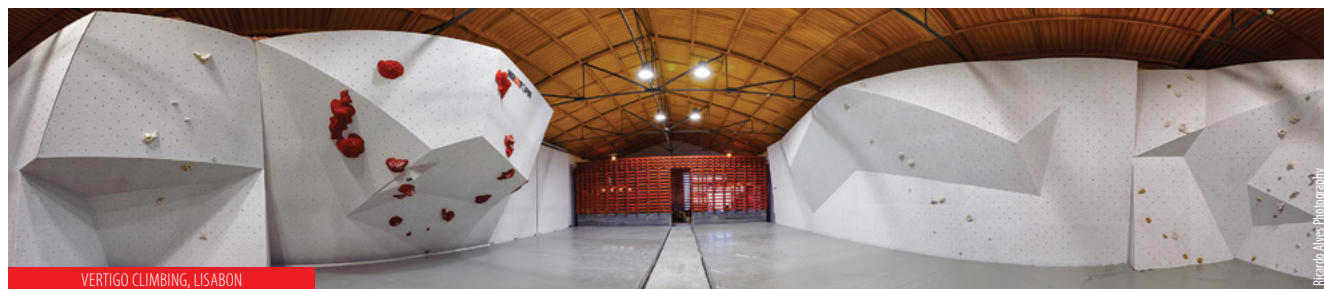

3 SETS WITH 16 INTERCHANGEABLE MODULES EACH

EACH MODULE COULD BE COMBINED AND/OR INTERCHANGED WITH ANOTHER ONE THAT HAS A MATCHING PROFILE IN BETWEEN THE SETS AND WITHIN EVERY SINGLE SET.

EASY TO INSTALL

9 DEGREES, AUSTRALIA
