

WALLTOPIA

ADJUSTABLE WALL 12X12

Compatible with:

- Quantum Board
- Kilter board
- Tension board
- Moonboard
- Grasshopper

About

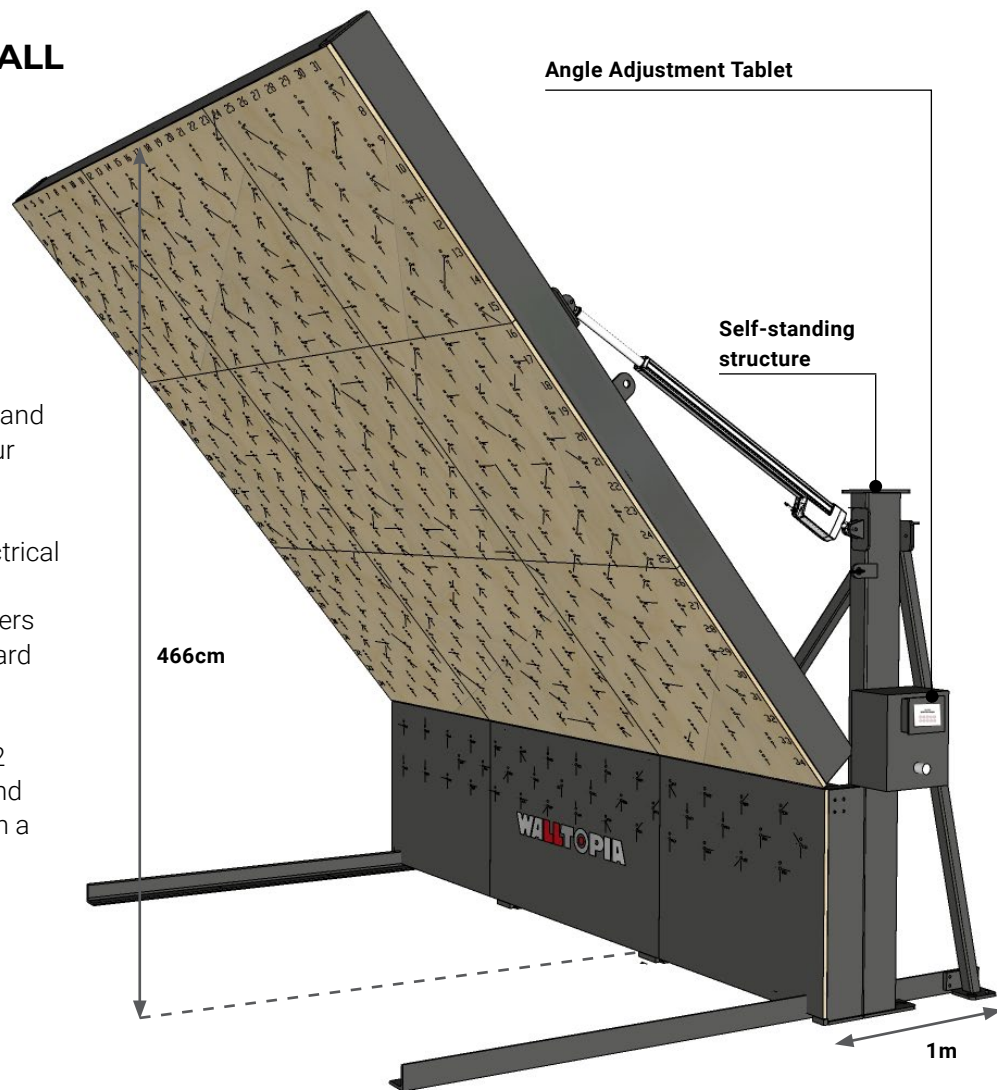

ONE FRAME TO SERVE ALL

The Walltopia Adjustable Wall 12x12 is a self-standing structure, engineered to meet boulder wall load standards at every angle of inclination.

All the widely used training boards layouts for Quantum Board, Kilter Board, Tension Board, MoonBoard and Grasshopper can be installed on our electrical angle-changing wall.

The adjustable wall comes with electrical actuators that change the angles of the board. This electrical system offers easy maintenance and straightforward operation.

The Walltopia Adjustable Wall 12x12 can be adjusted from 15° and 70° and the angle can be easily changed with a tablet.

FEATURES & SPECS

- **Overhang:** 15° to 70°
- **Adjustable angle system:** electrical actuators
- **Angle adjustment control:** with a touchscreen display, attached to the structure
- **Structure:** self-standing
- **Standards compliance:** fully compliant with EN boulder wall standard for loads applied to every angle position
- **T-nuts matrix:** Quantum Board, Kilter Board, Tension Board, Moon Board, Grasshopper, standard diamond 10 cm x 10 cm (4 x 4 in) or custom
- **LED hardware:** available to order through Walltopia

Dimensions

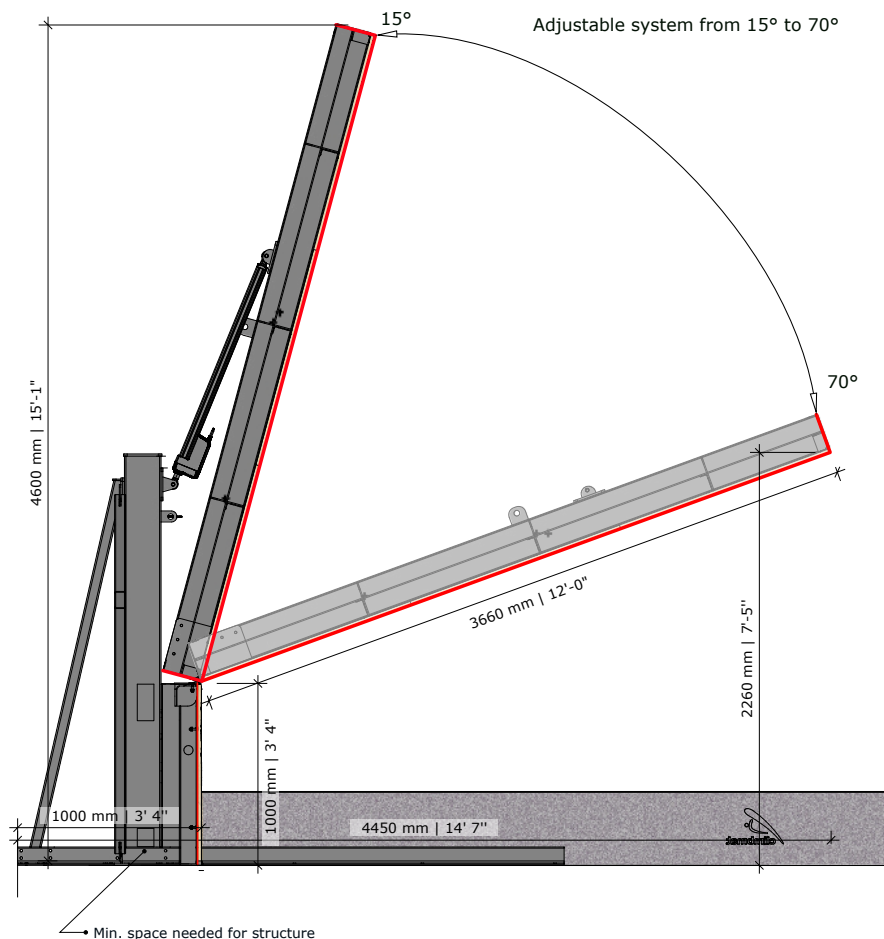

MADE TO FIT IN EVERY SPACE

The 12x12 ft (366x366 cm) wall is 466 cm (15 ft-3.5 in) tall at 15°, its highest angle incline.

The ideal space for the frame would have at least 480 cm (15.8 ft) clear height.

The adjustable frame can be easily installed even in spaces with low ceiling heights. And we can also make sure that the wall cannot be adjusted to angles for which there is insufficient space.

The required clearance for the self-standing structure is 1 meter at the back.

SAFETY BEYOND STANDARDS

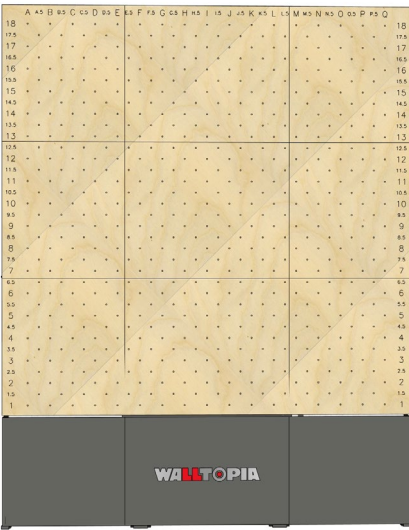

The structure is engineered by the Walltopia team of engineers with more than 27 years of experience in the industry.

To ensure the safety of all climbers, the structure is anchored to the ground and comes with two supporting metal forks, which are also anchored to the ground.

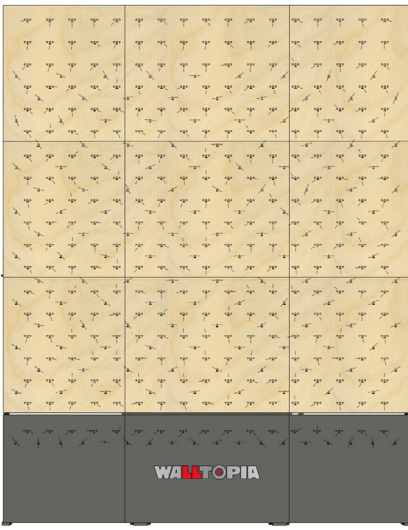

T-nut Raster

T-nut grid of your choice

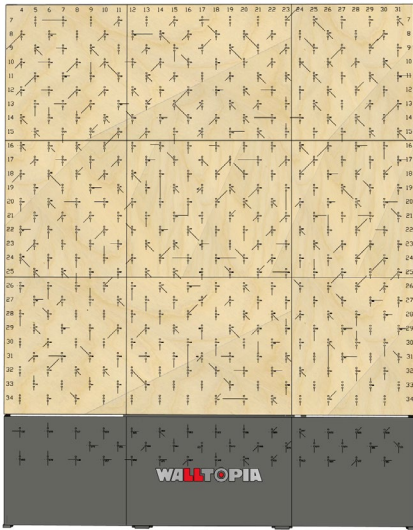

The Walltopia Adjustable Wall 12x12 can accommodate the t-nut grid of the most popular training board systems: Quantum Board, Kilter Board, Tension Board, MoonBoard and Grasshopper. It can also be ordered with a standard climbing wall diamond raster at 10 cm x 10 cm (4 x 4 in). If none of this suits your vision for the training wall in your gym, the raster can be customized according to your preference.
